

# School Spirit

January 2018

Hi everyone,

The start of a new year is a time for reflection and setting some goals for ourselves. I encourage each of you to set some goals for yourself in 2018. I have some traditional personal goals such as eating better, exercising more, and being the best father and husband that I can be. I also have some professional goals. I want to see our school district be the best that it can be for each of our students. I want to see each of our students have an educational experience that they are proud of and that makes them college and career ready. I want each of our students to be well-rounded with the best curricular and extracurricular experience they can have.

A long-standing partner of the Monticello Community School District that shares these goals has been the Monticello Community School District Foundation (MCSDF). The MCSDF wants our students to have all of the resources needed to have the best educational experience possible. They have worked very closely with the district to provide needed support in our classrooms since 1988. The mission of the MCSDF is:

***It is the mission of the Monticello Community School District Foundation Board to secure funds from sources other than the traditional methods of taxation. Upon securing such funds, the Foundation shall guide the expenditure of those funds in an effort to supplement the school district's ability to provide excellent opportunities for all students.***

The Monticello Community School District Foundation has donated over \$700,000 to Monticello Community School District projects over the years and are hoping to continue to support the 1 to 1 initiative in the future. Here are some examples of items the MCSDF has purchased in support of the Monticello Community School District:

### Monticello Board of Education Corner...

The Board of Education approved the Request for Proposal (RFP) from OPN Architects in the amount of \$29,950 for services for possible new construction and/or renovation to the existing Monticello Community School District facilities at their November Board Meeting. OPN Architects then met with our School Facilities Committee and received their feedback. And most recently, the OPN Design Team & Engineers met with Dennis Dirks and Superintendent Jaeger to discuss the current state of our school facilities. The OPN team went into each building to collect data for our facility assessment. They visited the HS, MS, Carpenter, Shannon, and the bus barn. On January 15, the OPN team will host an hour meeting with the staff from each campus to collect information/feedback on school facilities. Then on January 31, the OPN team will host a community meeting from 5-6pm which will be dedicated to listening to the community and ideas that people have related to our school facilities. Finally on January 31, from 6:30-8:00pm the OPN team will come to the School Facilities Committee meeting to share information on the meetings and update us on the facility assessment progress. Then they will begin working through facility discussions with our group. Things are moving in the right direction and should be coming together soon!

### FACTS ON HEAD LICE

**What are head lice?** Lot's of children get head lice each year. Head lice are small insects that live on the hairy parts of the body. They are very small, about the size of a sesame seed. Lice can be tan, brown or gray. Lice eggs are called nits. They are tiny, white and oval. Nits attach to the hair near the scalp, mostly behind the ears and at the base of the scalp. Head lice are not a sign of being dirty, are not dangerous and do not spread disease. The most common symptom is itching, but some children have no symptoms at all.

**How are lice spread?** \*Lice can't jump, they only crawl. Head to head contact is the most common way to get lice. \*The sharing of clothing (hats, scarfs, coats, sports uniforms) or articles (hair ribbons, barrettes, combs, brushes, towels or stuffed animals) recently worn or used by a person who has head lice.

**What can you do to prevent head lice?** \***Parents are the key to looking for and treating head lice.** The Iowa Department of Public Health advises parents to spend 15 minutes each week on each child carefully looking for head lice or nits. Talk to your children about what to avoid and what not to share.

\*Avoid head to head (hair to hair) contact during play and other activities at home, school and elsewhere (sports activities, playground, slumber parties, camp). \*Do not share combs, brushes, or towels. Disinfect combs and brushes by soaking them in hot water (at least 130 degrees F) for 5-10 minutes. \*Do not share hats, scarves, coats, sports uniforms, hair ribbons, brushes, combs or barrettes.

\*Do not lie on beds, cloth furniture, pillows, carpets, or stuffed animals that have been recently used by someone with head lice.

**What if you find live head lice or nits ?** The Iowa Department of Public Health recommends a 14-day treatment process. For a brochure talking about treatment recommendations and a treatment calendar detailing what to do each day, please visit:

[www.idph.state.ia.us/hcci/common/pdf/headlicebrochure.pdf](http://www.idph.state.ia.us/hcci/common/pdf/headlicebrochure.pdf) \*Do not fumigant sprays or fogs. They are not necessary to control head lice and be toxic if inhaled or absorbed through the skin. \*Only ordinary house cleaning, vacuuming, and washing bedding and clothes in hot water and drying on hot/high heat are needed. No special efforts or sprays are needed to clean your home. Only dead or dying lice are found on clothing, bedding or furniture. For stuffed animals and pillows, etc. you cannot wash and dry, seal in plastic bags for two weeks to kill the lice. \*The use of oils, mayonnaise, lotions, creams and vinegar has not proven effective. Kerosene, gasoline and similar products do not work and are dangerous.
