

The board values the participation and the support of school district-community groups, including, but not limited to, the booster club and parent-teacher organizations, which strive for the betterment of the school district and the educational program. Establishment of associations between the school district and the community groups may occur upon approval by the board. Each community group must have an administrator, or designee, who shall serve as the liaison representing the school district in working cooperatively with the community group. Membership and rules governing these community groups shall be determined by each group.

Prior to any purchase or donation of goods or services for the school district, the group will confer with the appropriate administrator to assist the group in purchasing goods or services to meet the school district's needs. A donation may not be approved if the school district's receipt of the donation would be contrary to school district policy, would require other expenses to be incurred, could set a precedent which would not be in the school district's best interests or otherwise would not be in the school district's best interests.

Funds raised by these groups for the school district may be kept as part of the accounts of the school district.

Date of Adoption: 2/24/14
