

David Greif Memorial Scholarship

David was an outgoing and knowledgeable man who enjoyed supporting his community, acting in community theater, and earning a multitude of trophies while tractor pulling. Although he graduated from Kirkwood Community College with a two-year degree in engineering technology, David eventually achieved engineering status due to his passion, natural acuity, and dedication. Through much hard work, he had a patent awarded in October of 2011 for an improvement on an existing valve. The David Greif family is offering this merit-based scholarship to a Monticello senior planning to attend Kirkwood Community College in memory of David, who passed away in March of 2009, since this is where he got such a fabulous education.

Eligibility

- *Must be a graduate of Monticello High School
- * Planning on pursuing an education in engineering or agriculture
- *Must be planning to attend Kirkwood Community College this fall
