

## **Old Middle School Facilities Plan:**

1. Keep Old Middle School “as is” until March of 2022 to allow the city to consider options.
2. School/Community can continue to use the facility. Cost to the school district is estimated between \$100,000 - \$120,000.
3. As of March 2022, if no formalized plan for the Old Middle School materializes, the school board will ask for bids to demolish the building with the intent for the demolition to begin in the summer 2022.
4. Because the school board recognizes the high community interest in a School Sports Facility and a Fitness Center at the high school site, a committee will be established to explore alternative funding options for this facility. (Options may be fundraisers, private donors, matching funds, business sponsors, etc.)
5. Once the school district cost for any Old Middle School option has been established, the school board can consider funding part of the School Sports Facility and Fitness Center at the high school site.
6. If sufficient funding can not be reached between school funding and alternative funding options for the School Sports Facility and Fitness Center projects, we will commit the funds raised to the new elementary project school and consider larger gym options as a part of the elementary school project, if the community supports that option.
7. The district reserves the right to change this timeline if necessary.
